Subject: Spill Reporting Requirements

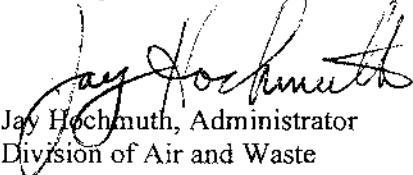

Dear Mr. Schoepke:

Thank you for your February 8, 2002 memo regarding air spill reporting requirements. Your memo correctly outlines the process that should be used to determine whether a release meets the requirements for immediate notification of a hazardous substance spill.

The Department is planning on preparing additional outreach materials on hazardous substance spill reporting, especially as it relates to air releases. We would be happy to work with your organization in developing such materials and ensuring that they reach their targeted audiences.

Robin Schmidt of the Remediation and Redevelopment program will be working with Jeff Myers of the Air Management program in this effort. Again, thank you for your continued interest in ensuring the regulatory community understands the requirements in place for reporting hazardous substance spills.

Sincerely,

Jay Hochmuth, Administrator
Division of Air and Waste
